REPORT ON REVIEW OF CONDENSED CONSOLIDATED INTERIM FINANCIAL INFORMATION TO THE BOARD OF DIRECTORS OF OOREDOO O.P.S.C.

Introduction

We have reviewed the accompanying condensed consolidated interim statement of financial position of Ooredoo Q.P.S.C. (the "Company") and its subsidiaries (together referred to as the "Group") as at 30 June 2021 and the related condensed consolidated interim statements of profit or loss and comprehensive income for the three-month and six-month periods then ended, and condensed consolidated interim statements of changes in equity and cash flows for the six-month period then ended, and explanatory notes. Management is responsible for the preparation and presentation of this condensed consolidated interim financial information in accordance with International Accounting Standard 34 'Interim Financial Reporting' as issued by the International Accounting Standard Board (IASB). Our responsibility is to express a conclusion on this condensed consolidated interim financial information based on our review.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, 'Review of interim financial information performed by the independent auditor of the entity'. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial information is not prepared, in all material respects, in accordance with International Accounting Standard 34 "Interim Financial Reporting".

Other investments are measured at fair value through other comprehensive income. The Group has elected to designate these investments in equity instruments as at FVTOCI as these investments are held for medium to long-term strategic purposes and not held for trading. Further, management believes that recognising short-term fluctuations in the fair value of these investments in the condensed consolidated interim statement of profit or loss would not be consistent with the Group's strategy.

Balances with banks are assessed to have low credit risk of default since these banks are highly regulated by the central banks of the respective countries. Accordingly, the Group estimates the loss allowance on balances with banks at the end of the reporting period at an amount equal to 12-month ECL. None of the balances with banks at the end of the reporting period are past due, and taking into account the historical default experience and the current credit ratings of the bank, the Group has recorded an impairment loss reversal of QR. 398 thousand during the sixmonth period ended 30 June 2021 (2020: reversal of QR. 63 thousand).

During the year 2016, the Communications and Media Commission (CMC) sent letters which restricted Asiacell from using certain bank accounts with a balance of QR 189,994 thousand as of 31 December 2020. On 31 January 2021, Asiacell deposited all the disputed amounts to CMC. Asiacell has also started procedures to release the restrictions on these balances. As of 30 June 2021, the restrictions of the bank deposits were released.

The remaining balance pertains to certain restricted bank deposits maintained for dividend payments, restricted cash deposits with banks related to issuance of bank guarantees, and the restricted cash related to the derivative financial instruments between the Group and a local bank.

15. ASSETS CLASSIFIED AS HELD FOR SALE

A portion of assets relating to Artajasa Pembayaran Elektronis ("APE"), a subsidiary of Indosat Ooredoo before 2017, were classified as held for sale in 2017 following the approval by the Extraordinary General Shareholders' Meeting of APE in order to divest portion of Indosat Ooredoo's investment based on requirements of local jurisdiction. Subsequently, on 28 May 2020, the Board of Commissioners of Lintasarta approved the plan to sell Indosat Ooredoo's entire investment in APE's shares. The related assets held for sale are measured at the lower of carrying amount or fair value less cost to sell. As at 30 June 2021, Lintasarta's management together with the potential buyers and existing shareholders are still working to complete the divestment process.

16. Translation reserve

The translation reserve comprises all foreign currency differences arising from the translation of the financial statements of foreign operations. During the current period, the movement was mainly coming from the Indonesian Rupiah and Myanmar Kyat.

Impairment losses on non-financial assets	(2,389,657)	-		
Others	26 7	(144)		
	(2,389,390)	(144)		

For the six-month period

(i) The Group tests intangible assets and goodwill for impairment on an annual basis unless there are any indicators of impairment. As a result of the on going situation in Myanmar, the Group has reassessed its investment in Myanmar by comparing the recoverable amount (based on value in use calculations computed using updated cash flow projections) to the carrying value of the cash generating unit. The updated computations indicate that the recoverable amount of the investment is less than its carrying value and as a result an impairment charge of QR 2,252.1 million has been reflected in the condensed consolidated interim financial information for the period.

The key assumptions and methodology applied in the model are consistent with the disclosures in the year end accounts. The Group has revised and recently approved updated cashflow projections taking into account the significant uncertainty that continues to exist as well as the more challenging operating conditions and revenue growth prospects in the market.

The discount rate has been increased to 21.6% (Q1 2021: 17.5%) to reflect the increased risk in the country together with a reduction in the terminal growth rate to 5.8% (Q1 2021: 7.5%) in line with current published forecasts. the situation is fluid and is being kept under review by management.

Sensitivity analysis:

At 30 June 2021, if the discount rate used had been higher/lower by 0.5% with all other variables held constant, the impairment charge would have been QR. 82 million higher/QR. 88 million lower.

Condensed consolidated interim financial information for the six-month period ended 30 June 2021 (All amounts are expressed in Qatari Riyals unless otherwise stated)

24. IMPAIRMENT LOSSES ON NON-FINANCIAL ASSETS (CONTINUED)

(ii) As a result of the plan by one of the Group's subsidiaries to execute nationwide 3G refarming and continuous decreasing trend on the voice and SMS revenues, the 3G and 2G assets of the operation were written down to their recoverable amounts. This has resulted in an impairment charge of QR 137.5 million which has been reflected in the condensed consolidated interim financial information for the period.

The Group is mainly engaged in a single line of business, being the supply of telecommunications services and related products. Outside of Qatar, the Group operates through its subsidiaries and associates and major operations that are reported to the Group's CODM are considered by the Group to be reportable segments. 28. FAIR VALUES OF FINANCIAL INSTRUMENTS

Fair value hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Quoted prices (unadjusted) prices in active markets for identical assets or liabilities that the Group can access at the measurement date; Inputs other than quoted prices included within level 1 that are

observable for the assets of liability, either directly or

Level 2: indirectly; and

Level 3: Unobservable inputs for the asset or liability.

The following table provides the fair value measurement hierarchy of the Group's financial asset and liabilities at 30 June 2021 and 31 December 2020:

There were no transfers among Levels 1, 2, and 3 for the six-month period ended 30 June 2021 and for the year ended 31 December 2020.

For fair value measurements categorised within Level 2 and 3 of the fair value hierarchy, the fair values are determined using appropriate valuation techniques, which include the use of mathematical models, such as discounted cash flow models and option pricing models, comparison to similar instruments for which market observables prices exist and other valuation techniques. Valuation techniques incorporate assumptions regarding discount rates, estimates of future cash flows and other factors. The following table summarises the quantitative information about the significant unobservable inputs used in level 3 fair value measurements:

	Fair value at 30 U	nobservable	Value of	Relationship of unobservable inputs to fair
Description	June 2021	inputs	inputs	value
	QR.'000			
				A change in the EV/EBITDA by 10% would increase/decrease the fair value by QAR 41,102

29. COVID-19 IMPACT

During the current period, due to continued uncertainties caused by COVID-19, Group has considered whether any adjustments and changes in judgments, estimates and risk management are required to be considered and reported in the condensed consolidated interim financial statements. The Group's business operations remain largely unaffected by the current situation.

The Group has performed a qualitative assessment for its investment in CGUs, considering the minimal impact of COVID-19 on entities operating in telecommunication sector, and compared the actual results for the six-month period ended 30 June 2021 against the budget and industry benchmarks which confirmed that the impairment assessment as at 31 December 2020 remains unchanged.

The Group has updated the inputs and assumptions used for the determination of expected credit losses ("ECLs") as at 30 June 2021. ECLs are estimated based on the relevant forward-looking macroeconomic factors, significant increase in credit risk, and assessing the indicators of impairment for the exposures in potentially affected sectors.

The Group will continue to closely monitor the impact of COVID-19 as the situation progresses to manage the potential business disruption COVID-19 outbreak may have on its operations and financial performance.

30. SIGNIFICANT ARRANGEMENT

On 28 December 2020, Ooredoo announced that it had entered into an exclusive and non-legally binding Memorandum of Understanding ("MoU") with CK Hutchison Holdings Limited in relation to a potential transaction to combine their respective telecommunications businesses in Indonesia, namely PT Indosat Tbk and PT Hutchison 3 Indonesia. As at the issuance date of the consolidated interim financial information, no binding agreement related to the possible combination has been entered into and Ooredoo is still in the early stage of assessing the merits of such a potential transaction. On 30 June 2021, the Group extended the exclusivity period of the MOU with CK Hutchison to potentially combine their Indonesian businesses until 16 August 2021.
